

BENGAL STRIKE CARRIER

Length: 700 meters
Mass: 80,000 tonnes
Max. Velocity: 130 kps
Acceleration: 6 k/s^2
Max Yaw/pitch/roll: 1/1/1 dps
Shield: 21 cm. equivalent
Armor:
Fore/Aft: 24/20cm
Right/left: 25cm

Designed to be 2 things, fast and cheap to build, the Bengal Strike carrier filled the need of a fast fighter transport admirably.

Armed with minimal armaments to accommodate its 104 fighters, the Bengal Strike Carrier would make a jump into a system, unload its fighters, and then withdraw to a safer location before the enemy fleet could respond.

However, war rarely follows any designer's plans for a ship. The TCS Tiger's Claw, a Bengal Strike Carrier was forced into numerous ship to ship battles and in more than one occasion ship to fleet engagements. The Tiger's Claw's engagement record have shown the downfall and limitation of the Bengal Strike carrier, and the design was ultimately replaced by more generalized carrier designs.

KILRATHI DREADNOUGHT

Class: Dreadnought
Manufacturer: N/A
Length: 22,000 meters
Mass: 290,000 metric tonnes
Max. Velocity: 100 kps
Acceleration: 10 k/s^2
Max Yaw/pitch/roll: 5/5/5 dps
Shield: 800 cm. equivalent

The Kilrathi Dreadnought was at one time the most terrifying ship in the skies. Dwarfing even the massive Kilrathi Carriers, the dreadnought was often seen as an arbiter of doom. Measuring in at over 20 kilometers long, the dreadnought mounted dozens of flak cannons for anti-fighter defence. For ship battles the dreadnought carries dozens of torpedos and the capacity to launch scores of them at a time.

In typical Kilrathi design fashion, the Dreadnought is designed to resemble a massive hand, or claw. This design has been the reason many people came to call the dreadnought the "Hand of Doom."

There was only one dreadnought of this class confirmed to exist during the war, and that was Prince Thrakath's personal command station. While it's not clear what happened to the actual ship following the war, it has not been seen since the destruction of Kilrah.
